

## BLOOD DONATION

Blood donation is a voluntary practice that helps those in need of blood transfusion due to some accident or illness. The most essential body fluid, excessive blood loss can cause an untimely death if the need is not fulfilled immediately. Hence, to save the people we have targeted to donate the 50 liters of blood every year. A programme to collect the 50 liters of blood from students with organizing the different blood donation camps arranged regularly. Students, from NSS, NCC and different teaching and non-teaching faculties involve during the camp. Activity creates the social responsibility during the life threatening situation amongst the students. During the session 2019-20 total 50 liters of blood donated to different blood banks from the institution.
