- **Title:** - Guest lecture on “**Sericulture for Women empowerment**”.

Date: - 9th March 2022

No. of Beneficiaries: - 66

Description of the program:-

- A Guest lecture was arranged by the department on “**Sericulture for Women empowerment**” for B.Sc. final year students on March 9, 2022. The guest speaker for the seminar was Dr. Manoj Thakare, Asst. Prof., Dept. of Zoology, KZS College, Kalmeshwar. Major goal of the program was to give students a better understanding of the practical uses of sericulture and the employment opportunities that would support women in starting small scale business.
- Dr. Manoj Thakare has pointed out that during the 1990s, when a number of foreign donor agencies made it possible for female-focused NGOs to develop and since then women's empowerment has received special attention in India's rural agro-industrial sector. Women's participation in the workforce, in social and personal decision-making, and in economic development has become a crucial problem as globalization has begun to exclude all socially marginalised groups. Dr. Manoj Thakare explained the complete production and marketing process for silk.

Outcome of the program:

Students gained understanding of the scientific process of producing silk as well as how to build a small business for the growing of silkworm, production, and sale of silk and related products.

Department of zoology has conducted the breeding of guppy fishes in the departmental breeding tanks. Regular feeding and care was taken to increase the numbers of guppy. Daily monitoring, and breeding rate were noticed and records were maintained..

The final your students were involve conducting the activity. Students were aware about the importance of biological agents to control the mosquito and its role in the ecology through conducting group discussion and talk. The total numbers of students were divided in to 4-5 groups having 6-8 students. Students were asked to release the fishes to the different water bodies where mosquito breed and attack is more. The infection of malaria dengue, high fever prone areas were also on the target to release the guppy fishes in the water.

Repeated releases of guppy were also conducted to check the number of fishes in water. We observed that winter season the mosquito infection and activity if more prominent and the activity specifically conducted during the winter.

➤ **Evidence of Success**

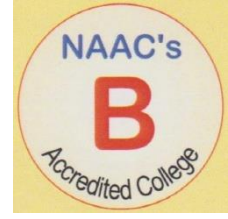

Every 20 to 30 days water were collected from the water bodies where students release the guppy and checked the number of fish and mosquito.

Photographs of guppy breeding and students activity within the water bodies were also noted.

➤ **Problems Encountered and Resources Required**

Specific attendant / person required to see the rate of guppy breeding and to handle the entire breeding process. During the academic schedule it is very difficult to maintain the breeding sometime. Limited breeding areas within the Zoology laboratory.

“Seed Boll Preparation Activity – 2022”

Title: One day workshop on “Seed Boll Preparation”.

Timing of the workshop: Morning 11.00 am to 2.00 pm, on 30th April, 2022.

Participant: Students from B. Sc. Botany and NSS Microbiology were the participants of this workshop.

Seed Balls are very effective method for dispersal of seeds with improved seed germination percentage. This method has shown very good results to increase green cover. Importance and methods of Seed ball was well explained by Dr Bipinchandra Kalbande in his introductory remark. This session was followed by practical session where Dr Kalbande have demonstrated how to prepare seed balls from various seeds which have been collected by students of NSS and Botany department. NSS and Botany students have also prepared seed balls under the guidance of Dr Kalbande. Total

Outcome of the program: Students learn the technique of Seed Ball preparation and decided to perfume this activity at home also, every year.

Number of beneficiaries: 63 Students from B. Sc. Botany and NSS unit were benefited from this workshop.

Seed Ball Preparation Activity

Increasing Green Space & Conservation of Indigenous Biodiversity Through Seed Balls

Every plant either reproduce or propagate through seeds or vegetative method. Most of the dispersal phenomenon i.e., dispersal of plant from one place to another is made through seed dispersal. Seeds get dispersed through various medium like birds, animals, humans and through air wind also. Almost all the indigenous varieties are spread through this phenomenon. But, survival of these seeds and their germination percentage is a problem. 80 to 90 % of these seeds are either consumed or destroyed by other animals or birds or insects. Also, germination percentage is not so good.

This problem can be tackled by Seed Ball technology. Seed balls are marble-sized balls of clay, earth, humus or compost, and seeds. It is also known as Seed bombing technology. It is a farming technique of introducing vegetation to land by throwing or dropping the seed balls. Seed balls are uniquely made to be dispersed off in a bit of a controlled manner and give life to new plants. Seed balls help increase green space and seed balls can work well anywhere with a rainy season. Seed balls have an 80 percent growth success rate in comparison to regular seedlings, which helps people farming in rural areas have a more consistent supply of food.

Considering this Department of Botany have decided to take initiative and adopt this good practice of collecting seeds and making seed balls from this season. We have decided to involve National Service Scheme (NSS) department of our college in this activity. The meeting regarding this was held on October 1st, 2021 in Botany Department.

Following are the points decided as a road map for session 2021-22 for this activity.

- All the botany students and NSS cadets will be involved in this drive.
- Area surrounding the Katol Tahasil will be targeted for the first year of this activity.
- Target of making at least 1500 Seed balls of various varieties of plants.
- Seed collection will be done by all involved students.
- Seed ball preparation will be started in the month of March 2022.
- Dispersal of these seed balls will be done in the initiation of rainy season.
