#### Title

“Conservation & re-introduction of endangered plants species in to ecosystem”

#### Objectives of the Practice:

The main objective of this activity is to conserve endangered plant species by *in-vitro* conservation techniques and reintroduce these plants into their environment so that they can take their proper place in their ecosystem.

#### The Context:

Department of Botany is equipped with state of an art Plant Tissue Culture Lab funded by honourable management of the college. We are using this facility to save the endangered plant species in Vidarbha region. We have adopted “Yellow Palah” *Butea monosperma*.

#### The Practice:

Department of Botany have decided to work on this plant for its conservation because this plant has now become endangered and comes into red list of endangered plants. We have identified its location in and we are taking care of that plant. Educating locals about the plant and its importance. We are collecting seed of these plants. Seeds and leaves of the plants are being used in as an explant in *in-vitro* germination program by using plant tissue culture techniques. Interested students are involved in this activity as well.

#### Evidence of Success:

Report of the events conducted are attached below.

#### Problems Encountered and Resources Required:

This activity is very important and prestigious. To trace the location of endangered plant is actually challenging.

#### Title

“Recycling of office waste paper by converting them into seed paper”

#### Objectives of the Practice:

The main objective of this practice is to recycle & reuse office waste paper in an interesting and environmentally friendly way.

#### The Context:

Various Departments and offices in the campus donate their waste office paper to the department of Botany and students of Botany department then recycle that paper into seed paper using various seeds of flowering and vegetable plants.

#### The Practice:

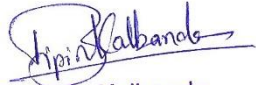

Department of Botany is dedicated to keep the campus clean and reduce the carbon footprint of our college. We collect waste office paper from all the departments and administrative offices of campus. Students then recycle that paper into seed paper. Waste paper pulp is first created and that pulp is then moulded into various shapes and sizes with incorporation of various small seeds of flowering and vegetable plants. These papers are then distributed to donor departments where they use that according to their need. Most of these papers are decorated to create gifts cards to the guests coming to the college.

#### Evidence of Success:

Report of the events conducted are attached below.

#### Problems Encountered and Resources Required:

Students enjoy this activity as they do some creative work. This activity is not expensive. Enjoyed by the teachers also.

**Title**

**“Environmental awareness & biodiversity conservation through Seed Collection & Seed Ball Preparation”**

**Objectives of the Practice:**

The main objective of this practice is to create awareness in the students towards the mother nature & conservation biodiversity.

**The Context:**

Students are involved in the collection of various plant seeds and in the making of seed balls. Which helps them to understand about the diversity of plant species around them.

**The Practice:**

Number of aboriginal plant species are getting extinct and the number of plants is decreasing day by day. Students involved in this activity become aware about various types of plants and their seeds. These seeds are stored in “**Botany Seed Bank.**” Seeds balls are prepared by enclosing the seeds in the mixture of soil, organic manure and sand, and a small ball is prepared. This soil ball containing seeds are then thrown in barren lands or surrounding areas before rain or during rainy season. This coat increases the germination percentage of seeds by providing protection from birds, animal and insects. These seed balls were then distributed to the students and staff for distributing balls in their surrounding environment. This practice is important specially in Indian context as student became more and more aware about indigenous plants species and helps our ecosystem to flourish.

**Evidence of Success:**

Report of the events conducted are attached below.

**Problems Encountered and Resources Required:**

The main task is collection of seeds. Students need to collect as much seeds as possible and they should be as many as plant varieties of plants specially fruits and medicinal plants. Other material. Apart from seeds black cotton soil, organic manure, sand,

## ***“Seed Ball Preparation”***

Department of Botany in association with NSS Department have organised a workshop on “**H**ands on training to prepare soil Seed Ball” for NSS & Botany students. The workshop is organised on 30<sup>th</sup> of April, 2022. Studentss will be explained about the concept of seed ball technology and its importance in current senario. Also, they will given handson training on seed ball preparations.

**Title: One day workshop on “Seed Boll Preparation”.**

**Timing of the workshop:** Morning 11.00 am to 2.00 pm, on 30<sup>th</sup> April, 2022.

**Participant:** Students from B. Sc. Botany and NSS Microbiology were the participants of this workshop.

Seed Balls are very effective method for dispersal of seeds with improved seed germination percentage. This method has shown very good results to increase green cover. Importance and methods of Seed ball was well explained by Dr Bipinchandra Kalbande in his introductory remark. This session was followed by practical session where Dr Kalbande have demonstrated how to prepare seed balls from various seeds which have been collected by students of NSS and Botany department. NSS and Botany students have also prepared seed balls under the guidance of Dr Kalbande. Total

**Outcome of the program:** Students learn the technique of Seed Ball preparation and decided to perform this activity at home also, every year.

**Number of beneficiaries: 63 Students** from B. Sc. Botany and NSS unit were benefited from this workshop.

### **Seed Ball Preparation Activity**

#### **Increasing Green Space & Conservation of Indigenous Biodiversity Through Seed Balls**

Every plant either reproduce or propagate through seeds or vegetative method. Most of the dispersal phenomenon i.e., dispersal of plant from one place to another is made through seed dispersal. Seeds get dispersed through various medium like birds, animals, humans and through air wind also. Almost all the indigenous varieties are spread through this phenomenon. But, survival of these seeds and their germination percentage is a problem. 80 to 90 % of these seeds are either consumed or destroyed by other animals or birds or insects. Also, germination percentage is not so good.

This problem can be tackled by Seed Ball technology. Seed balls are marble-sized balls of clay, earth, humus or compost, and seeds. It is also known as Seed bombing technology. It is a farming technique of introducing vegetation to land by throwing or dropping the seed balls. Seed balls are uniquely made to be dispersed off in a bit of a controlled manner and give life to new plants. Seed balls help increase green space and seed balls can work well anywhere with a rainy season. Seed balls have an 80 percent growth success rate in comparison to regular seedlings, which helps people farming in rural areas have a more consistent supply of food.

Considering this Department of Botany have decided to take initiative and adopt this good practice of collecting seeds and making seed balls from this season. We have decided to involve National Service Scheme (NSS) department of our college in this activity. The meeting regarding this was held on October 1<sup>st</sup>, 2021 in Botany Department.

Following are the points decided as a road map for session 2021-22 for this activity.

- All the botany students and NSS cadets will be involved in this drive.
- Area surrounding the Katol Tahasil will be targeted for the first year of this activity.
- Target of making at least 1500 Seed balls of various varieties of plants.
- Seed collection will be done by all involved students.
- Seed ball preparation will be started in the month of March 2022.
- Dispersal of these seed balls will be done in the initiation of rainy season.

#### Title

“Certificate Course in Plant Tissue Culture Techniques”

#### Objectives of the Practice:

Objective of this practice is train students in new age technique which will help them to get industry job and to enhance their entrepreneur skills.

#### The Context:

Department of Botany, from last three years have been conducting University affiliated certificate course in plant tissue culture techniques. Students learn theoretical and most important practical aspect about plant tissue culture techniques.

#### The Practice:

In each academic session Department of Botany organises three months certificate course in PTC techniques. Students enrolled for the training were taught theory of plant tissue culture technique and side by side detailed practical sessions were taken. On hand training was given to the students so they gained perfection in the various lab techniques and learn about operation of various instruments used.

#### Evidence of Success:

Report of the events conducted are attached below.

#### Problems Encountered and Resources Required:

Fees for the program was kept very low, only Rs. 500/- so that students from rural areas, which makes the most of percentage of our college students, can afford this training. This is very expensive technique. It is difficult to maintain expenses of the PTC lab established.

### "Nest Building Workshop - 2022"

**Title: One day workshop on "Nest Building Workshop - 2022".**

**Timing of the workshop:** Morning 10.00 am onwards, on 4<sup>th</sup> of March, 2022.

**Participant:** Students from B. Sc. CBZ and Microbiology were the participants of this workshop.

To create awareness amongst students about Mother Nature and its habitants, Department of Zoology & Botany have organised one day 'Workshop on Nest Building' on 4<sup>th</sup> of March, 2022. Aim of this workshop is to train students in artificial nest building which can be used as a natural home by birds. Chief guest of this workshop is Shri. Tanveer Mirza, President of Yashodhara NGO Nagpur, Maharashtra, India. He is the well-known nature activist working in the area of Ecosystem Conservation and awareness creation regarding nature.

Workshop started at 11.10 am in the laboratory of department of zoology. Dr. Vikas Barsagade introduced the guest to students and gave brief introduction about the workshop and its importance. All the raw material for nest building was brought by Mirza sir and some was organised by departments. All the students were divided into 12 groups. Mirza sir demonstrate the

techniques of artificial nest building and also explain its importance. All 12 groups prepare their artificial nests, teachers also participate in the activity. As a token of gratitude, we gave a plant sapling to Mirza sir by the hands of Dr. Bipinchandra Kalbande. At the end Miss. Sai Thote, B.Sc. Final year CBZ student express vote of thanks.

**Outcome of the program:** Students learn the technique of nest making and also learn about the importance of conservation of ecosystem and nature for survival of all.

**Number of beneficiaries:** 38 Students from B. Sc. Sem-VI CBZ were benefited from this workshop.
