Title

“Recycling of office waste paper by converting them into seed paper”

Objectives of the Practice:

The main objective of this practice is to recycle & reuse office waste paper in an interesting and environmentally friendly way.

The Context:

Various Departments and offices in the campus donate their waste office paper to the department of Botany and students of Botany department then recycle that paper into seed paper using various seeds of flowering and vegetable plants.

The Practice:

Department of Botany is dedicated to keep the campus clean and reduce the carbon footprint of our college. We collect waste office paper from all the departments and administrative offices of campus. Students then recycle that paper into seed paper. Waste paper pulp is first created and that pulp is then moulded into various shapes and sizes with incorporation of various small seeds of flowering and vegetable plants. These papers are then distributed to donor departments where they use that according to their need. Most of these papers are decorated to create gifts cards to the guests coming to the college.

Evidence of Success:

Report of the events conducted are attached below.

Problems Encountered and Resources Required:

Students enjoy this activity as they do some creative work. This activity is not expensive. Enjoyed by the teachers also.

Title

**“Environmental awareness & biodiversity conservation through Seed Collection
& Seed Ball Preparation”**

Objectives of the Practice:

The main objective of this practice is to create awareness in the students towards the mother nature & conservation biodiversity.

The Context:

Students are involved in the collection of various plant seeds and in the making of seed balls. Which helps them to understand about the diversity of plant species around them.

The Practice:

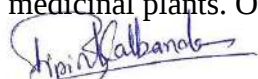

Number of aboriginal plant species are getting extinct and the number of plants is decreasing day by day. Students involved in this activity become aware about various types of plants and their seeds. These seeds are stored in “**Botany Seed Bank.**” Seeds balls are prepared by enclosing the seeds in the mixture of soil, organic manure and sand, and a small ball is prepared. This soil ball containing seeds are then thrown in barren lands or surrounding areas before rain or during rainy season. This coat increases the germination percentage of seeds by providing protection from birds, animal and insects. These seed balls were then distributed to the students and staff for distributing balls in their surrounding environment. This practice is important specially in Indian context as student became more and more aware about indigenous plants species and helps our ecosystem to flourish.

Evidence of Success:

Report of the events conducted are attached below.

Problems Encountered and Resources Required:

The main task is collection of seeds. Students need to collect as much seeds as possible and they should be as many as plant varieties of plants specially fruits and medicinal plants. Other material. Apart from seeds black cotton soil, organic manure, sand.
